

To whom it may concern.

I'm a Subscriber to XM Radio and have been for about 18 months and it is the best investment I have ever made in entertainment for my Peterbilt truck. I drive over the road and I just love the new traffic and weather channels for several of the key cities in the U.S.. It saves me so much time trying to find a channel on the AM dial that has traffic, as an example I was going west on the 60 freeway in southern California last week and I just hit my preset for L.A. traffic and learned of a wreck on the 605 Freeway and was able to go to the 710 freeway and stay out of a 45 minute traffic jam with just hitting one button on my radio. Please allow XM Radio to continue to air this type of programming as it is extremely helpful in allowing me to do my job with the least amount of wasted time and effort.

letter into consideration.

Thank you for taking this

Respectively, David W.
